

People with dysphagia need thickened drinks that flow slowly.

We've therefore simple reliable ways for you to make and provide Slõ thickened drinks for all your healthcare needs.

You can boost hydration levels by changing a favourite cold drink into a Slõ Cold Drink such as Slõ Orange, change tea or coffee to a Slõ Hot Drink. Slõ Milkshakes+ provide a nutritional boost. Pill-Eze makes pills easy to swallow and you can change alcoholic drinks into Slõ Wine, Beer or Cider.

All of them are:

Safer to swallow: We analysed how each drink's Ph levels, fats and temperature affect our thickening powders' ability to thicken. This allowed us to calculate the amount required to thicken one drink to a specific consistency and then put that in a single serve sachet.

You'll never add too much thickener again and your Slõ Drink will always be safer to swallow.

Easy to prepare: Simply collect the correct sachet IDDSI 1, 2 or 3 and mix the contents with the volume of the drink specified.

Palatable to drink: Our thickeners dissolve quickly and fully to ensure Slõ Drinks are completely smooth.
They also look as clear and bright as ordinary drinks and taste as good, to give back the simple pleasure of something enjoyable to drink.

Slõ Drinks are only available to buy from us online via our Pharmacy shop www.slodrinke.com/shop

All of them are available at IDDSI Levels, 1, 2 and 3 and each is provided with full nutritional details, preparation instructions and prices.

However, if you are unsure of which ones you want to try you can order a Sample which includes 3 of any Slõ Drinks.

Of course, if you need any assistance or further information we are here to help.

You can call us anytime on 03452 222 205 or email us at support@slodrinke.com

! Before using:

Check the consistency, ingredients, and the total nutrition content of the finished drink (sachet nutrition + drink nutrition) are suitable for the drinker. If in doubt, consult a Doctor, Clinician or Pharmacist.

Not to be used as a sole source of nutrition.

For oral consumption only.

Store in a cool dry place and use by the best before date on the sachet.

For 3 years+

Slõ Alcohol is for adults 18+ to enjoy responsibly.

Hydration

These sachets are to add to a favourite branded drink or to a drink made in a favourite way. Like a cup of tea with just a splash of milk or a coffee with cream.

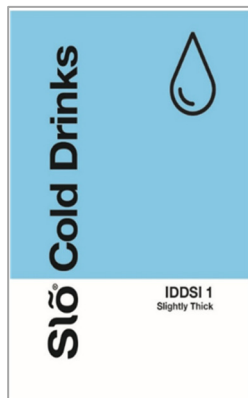

In the spirit of thinking different, remember...

...the Slō Cold Drinks sachet can be used with 500ml bottles of non fizzy drinks. Just pour in and shake to change them into a Slō Drink

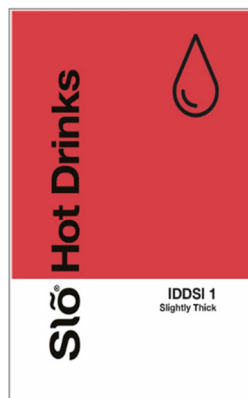

...fizzy drinks are made with water and so Slō Fizzy drinks can be used for hydration and...

...these sachets are small and so Slō Drinks can be made in public without attracting un-comfortable stares.

All available at IDDSI Levels 1, 2 & 3.

Mix with fruit juice cordials, smooth fruit juices from concentrate and water: tap or bottled.

Mix with **hot** tea: black, white, green & herbal and coffee, with and without milk.

Mix with fizzy drinks, including fizzy water without making a volcano of froth!

Nutrition

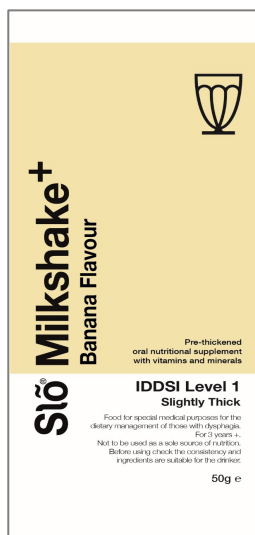

Slō Milkshakes+ have been created to safely supplement your nutritional intake and stay healthy.

They will provide a maximum of 399 calories, + minimum of 20g of protein, +25 essential vitamins & minerals.

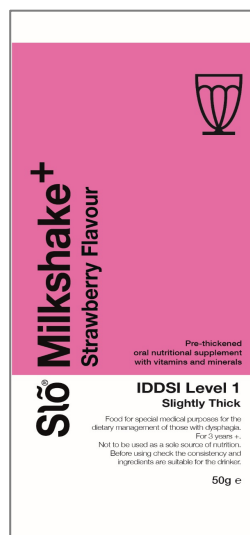

Slō Vitamin Drops will supplement Vitamin intake. Dropped straight onto the tongue with a pipette, they are absorbed quickly removing the need to swallow.

Available in Vitamin C and soon D3 & K2.

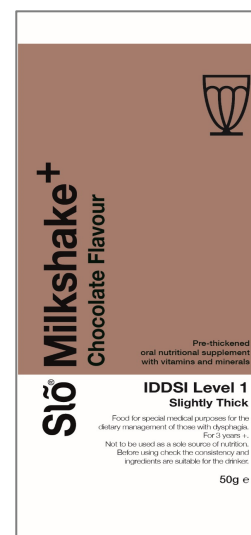

All available at IDDSI Levels 1, 2 & 3.

Mix with whole milk.

Mix with whole milk.

Mix with whole milk.

Ready to use. No mixing required

Medication

Pill-Eze makes pills easy and safer to swallow. You don't have to worry about pills getting stuck and its sweet cherry flavour hides the chalky powdery taste of pills in it.

! Before using it is a good idea to confirm with a health professional that Pill-Eze is suitable to use.

Suitable for those using IDDSI Levels 1, 2 & 3.

Ready to use. No mixing required.

Recreation

For many, enjoying a glass of wine or a beer with friends and relatives is an important part of their life. It's a simple pleasure that helps them cope with their dysphagia.

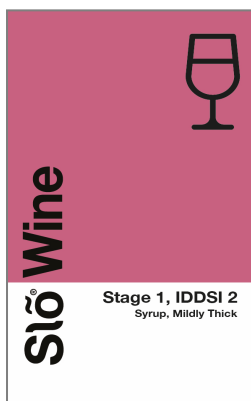

We've therefore used our know-how creating drinks for healthcare to make alcoholic drinks safer to swallow.

!Remember... Slō Alcoholic drinks are only for those of legal age to drink and enjoy responsibly.

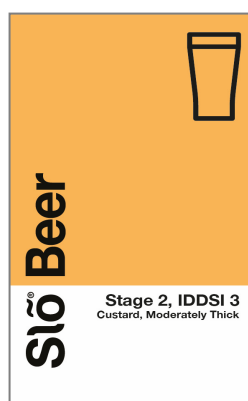

NEVER mix them with medication.

If medication is being taken it is a good idea to confirm with a health professional that Slō Alcohol is suitable to drink.

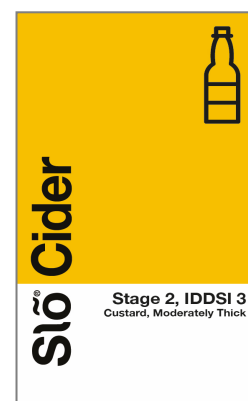

All available at IDDSI Levels 1, 2 & 3.

Mix with white, red or rose wine and fortified wines. E.g. Sherry & Port.

Mix with Beer in bottles and tins.

Mix with fizzy cider in bottles and tins; original or flavoured.

Mix with Champagne and sparkling wines or pre-made mixers. E.g. Gin & Tonic
