

Consistency Translator

As the new IDDSI numbering system is being added to the terms used to describe consistency here in the UK, to help its smooth integration we have shown below how it fits with the terms currently used here.

It occurred to us, that as Slō Drinks are used around the world we should also list all the other terms we know of. We are sure there will be others and so if you have terms you use in your Country, please email them to us support@slodrinks.com and we will add them to the list and share them for the benefit of all.

Slō Drinks	Stage 0.5	Stage 1	Stage 2
